Appomattox is a wonderful place and will remain so into the year 2025.

I believe by the year 2025 the Town and County will have consolidated and there will be only one government thus one real estate and personal property tax. The wastewater and water facilities will be operated by a service authority with its own Board of Directors and employees separate from the consolidated government.

Appomattox will undergo a major change by the year 2025. The Main Street renovation project along with several homeowners and businesses who have changed the appearance of their property have in the year 2000 initiated an idea that by 2025 will have engulfed most of the Town thereby making Appomattox a major tourist attraction in our state.

Also, by the year 2025 we will have a drama enacted each night from April through October, of the surrender that took place at nearby Appomattox Courthouse National Historical Park. The drama will help to keep visitors overnight thus significantly contributing to the local economy.

The industrial park will be in full swing with many new high tech jobs helping to keep our young people at home.

All in all the change to Appomattox will still remain slow and stable. Appomattox will continue to be a wonderful place to live and rear a family or just to retire to.
